

INSTRUCTIONS FOR MANHATTAN DSR-1500

This assumes you have 3ABN on your screen so start there.

1. Press SETUP to see this screen:

SET UP

LNB SETTING

CHANNEL SEARCH

EDIT CHANNEL LIST

TV SETTING

SYSTEM SETTING

Highlight the CHANNEL SEARCH line and press OK

The Channel Search screen looks like this

CHANNEL SEARCH	
INPUT/POS/NAME	
D1:P1:GE 4 (101.0W)	
ANA LNB POS	
BQ	USER SETTINGS
TP FREQUENCY	11983 OR 10983
POLARITY	HOR
SKEW	OFF
SYMBOL RATE	05900
EDIT PID	SHOW MENU
SEARCH OPTION	ALL
SIGNAL STRENGTH	
YELLOW BAR	
"START SEARCH"	

2. Highlight the BQ line.

If it reads: 5. WDYN TV (Worcester) highlight TP Frequency and enter **10983**

If it reads 1 or some other number, highlight TP Frequency and enter **11983**.

3. After entering the correct frequency press the down arrow until **START SEARCH** has quotation marks. Press OK. The new channels should lock in during this search

TV	RADIO
ADVENTIST TV	LifeTalk Radio
ATN Eng/Spa	
ATN Fre/Por	
"STORE"	

4. With quotation marks around **STORE** press OK to store this information in your receiver.

CHANNEL DATA IS BEING UPDATED

RETURN TO PICTURE

Now use the channel selection buttons to find your new channels. You may find more than one ATN channel. These will be used for events that offer translated programs.

CHANNEL SEARCH

Search Index	1
Antenna	1
Satellite	AMC 4 (101.0W)
Search Mode	Auto All
TP Data	TPI:3ABN
LNB Skew	.45
Positioner	None

START

Highlight START and press OK.

A **Searching** Screen will appear followed by a **Storing** Data screen and the system will reboot. When a picture reappears, use the channel changing button until you find Adventist TV with the current ATN program. More than one channel may appear for a specific network. These channels will be used for extra languages when an event offers them. The actual channel number will depend on how many channels are already loaded into your system.
